July 26, 2007

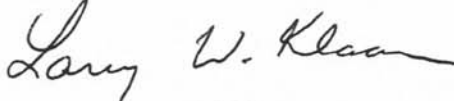

To whom it may concern:

Dear Sir or Madam:

This morning Cecilia Carmean presented a one year old Akita named Bullseye for radiographic examination of the hip joints.

The head of the femur was well-seated in the acetabulum and the joint surfaces were smooth. No evidence of hip dysplasia was seen at this time.

Sincerely,

A handwritten signature in cursive script that reads "Larry W. Klaaren". The signature is written in black ink and is positioned above the typed name and title.

Larry W. Klaaren D.V.M.  
Veterinarian, Forest South Animal Hospital
