University Park, IL 60484

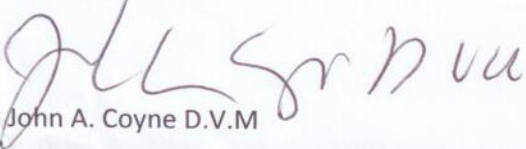

April 2, 2011

To whom it may concern:

Cecilia Carmean presented a one and a half year old Akita named Tarzan Jr for radiographic examination of the hip joints.

The head of the femur was well-seated in the acetabulum and the joint surfaces were smooth. No evidence of hip dysplasia was seen at this time.

Sincerely,

A handwritten signature in black ink, appearing to read "JACoyne", is written over the typed name. The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

John A. Coyne D.V.M
